All:

See my slides attached here – Ryan and Catherine: I think we should schedule a quick call this week to talk about what we're covering. I'd like to avoid as much overlap as possible.

Do you all have time tomorrow morning or afternoon?

Ryan,

Thanks for the follow up! That's exactly the sorts of things I am hoping you will cover; recent accomplishments and approaching milestones. Covering the general challenges re: the budget is spot on as well! I know our members care about the inventory reset developments; the Active-Inactive requirements.

I am looking forward to meeting you!

PS. Can I use this picture of you?

Thanks,  
Bradford

Bradford, thanks for the note. I look forward to being a part of the panel.

I'm not exactly clear what the hope was with respect to "EPA perspective and future outlooks, challenges, hopes." In the interest of avoiding duplication, I'd plan to speak to EPA's recent accomplishments and upcoming deadlines/milestones under TSCA. Re: challenges, there are general challenges (budget/resources and deadlines) but also challenges unique to specific activities. If there is any particular substantive area that you think this audience would appreciate getting an update on, that would also be helpful to know.

Thanks,  
Ryan

**Subject:** RE: 2018 Responsible Care Conference - LCSA session

Dear Catherine (Evonik), Richard (ACC) and Ryan (EPA),

As a 2018 Responsible Care Conference speaker, I want to thank you for helping us this year. Your involvement is very much appreciated! Ryan, I would like to especially thank you for being able to join us in Florida this year. I have been working with Hans for a bit now to help arrange your involvement.

I know that we have exchanged some emails on this topic and a moment ago, Richard came by and told me about a conversation he and Ryan had about this session.

In addition, I want to remind the group that we are collecting headshots and bios for our 2018 Responsible Care conference phone/computer app. We can plan to gather in the conference room about 30 minutes before the session so can all double check the presentations and cover the slide advancer, etc. (Catherine and Richard, I will use pictures from previous years or our internal files, unless you want to send something else)

#### **Order of Presentations**

1. Richard  
Topic: Overview of LCSA from ACC perspective, future outlook
2. Catherine  
Topic: Company perspective on how LCSA is being addressed within their company, challenges, etc.
3. Ryan  
Topic: EPA perspective and future outlooks, challenges, hopes

Here are some quick tips

- Each person will have about 20-25 minutes to present, allowing for 5 minutes of Q/A at the end. Sometimes, this runs a bit long, and other times, not so much. I would typically let the questions go for as long as it could.
- We can meet at about 08:00 AM the morning of the session to review the presentations and the slide advancer, etc.
- We will likely have about 100-140 people in the room, mainly corporate EHS and regulatory specialists.
- Since this is an 'Advanced Systems' presentation, feel free to skip the '101' type of activities
- Once I have all the presentations, I will circulate them to the group

Tuesday, Day 2

<b>Lautenberg Chemical Safety Act: Addressing new Regulatory Requirements &amp; Leveraging the Product Safety Code</b>  <b>Advanced Systems</b> <b>8:30 – 10:00</b>	The Lautenberg Chemical Safety Act is the successor to the Toxic Substance Control Act (TSCA) and was signed into law in June 2016. As a result of its enactment, chemicals management by the federal government in the US has been updated and modernized. In today's environment, learn about the ways this industry regulation can affect your company. This session will cover the status of implementation, potential issues in the future, and how they could affect Responsible Care implementation.	<b>Richard Starr, American Chemistry Council</b>  <b>Catherine Croke, Evonik Corporation</b>  <b>Ryan Schmit, EPA</b>	Bradford J.
